

Concerning MB Docket No. 04-232; We are a small non profit Christian ministry and feel this proposed requirement of recording all programming from 6am-10pm everyday and maintaining copies of this programming for 60 to 90 days would be a tremendous burden for our small staff. The expense of implementing this proposal with the equipment necessary would also be very difficult for us. Also, because all our programming is family oriented, this proposal and the resulting financial and labor expenses would be a waste of our time and money. It appears this proposal is the result of a very small percentage of radio stations that programming offensive/obsense material. There has to be another way to accomplish your purposes without penalizing the vast majority of radio stations that don't broadcast any offensive material.

Respectfully submitted,

Jim Stephens

President

Family Radio Network, Inc.
